
2010 NEMF Collection, Alphabetical Listing

Soyuzivka Ukrainian Cultural Heritage Center, Kerhonkson, NY
September 23 - 26, 2010

Total Number of species collected: 292, including 20 species
that are new to the NEMF master list (indicated by a
checked box), of which 6 were in new genera.

Abortiporus

- biennis

Agaricus

- campestris

Amanita

- amerifulva
- bisporigera
- brunnescens var. brunnescens
- citrina f. lavendula
- flavoconia
- flavorubens
- longicuneus nom. prov.
- magnivadix
- muscaria var. guessowii
- N44 (T)
- onusta
- pseudovolvata
- subcokeri

Armillaria

- mellea
- ostoyae
- tabescens

Austroboletus

- gracilis

Batkoa

- sp.

Bisporella

- citrina

Bjerkandera

- adusta

Bolbitius

- callisteus

Boletopsis

- grisea

Boletus

- huronensis
- pulverulentus
- speciosus var. brunneus
- subvelutipes

Bulgaria

- inquinans

Calostoma

- cinnabarina

Calvatia

- cyathiformis

Camarops

- petersii

Cantharellula

- umbonata

Cantharellus

- cibarius
- cinnabarinus
- ignicolor
- tubaeformis

Ceriporia

- spissa

Cerrena

- unicolor

Chalciporus

- piperatus

Chlorociboria

- aeruginascens

Chlorosplenium

- chlora

Chroogomphus

- rutilus
- vinicola

Cladonia

- coniocraea
- cornuta
- cristatella
- dimorphoclada
- furcata
- macilenta
- ochrochlora
- phyllophora
- rangiferina
- rei
- squamosus
- uncialis

Climacocystis

- borealis

Climacodon

- septentrionale

Collybia

- cookei
- tuberosa

Conocybe

- filaris

Conoplea

- juniperi

Coprinellus

- micaceus

Coprinopsis

- lagopides

Coprinus

- comatus

Cortinarius

- armillatus
- corrugatus
- semisanguineus
- whitei

Craterellus

- fallax

Crucibulum

- laeve

Dacrymyces

- palmatus

Daedalea

- quercina

Daedaleopsis

- confragosa

Daldinia

- concentrica

Diatrype

- stigma

Enteridium

- lycoperdon

Entocybe

- sp.

Entoloma

- abortivum

Exidia

- recisa

Fistulina

- hepatica

Flammulina

- velutipes

Flavoparmelia

- caperata

Fomes

- fomentarius

Fomitopsis

- pinicola

Fuligo

- septica

Galerina

- marginata

Ganoderma

- applanatum
- tsugae

Gloeophyllum

- trabeum

Gloeoporus

- dichrous

Graphis

- scripta

Grifola

- frondosa

Gymnopilus

- luteus

Gymnopus

- dryophilus

Gyrodon

- merulioides

Gyroporus

- castaneus

Hapalopilus

- nidulans

Helvella

- elastica

Hemitrichia

- serpula
- sp.

Hericium

- americanum
- erinaceus
- ramosum

Humidicutis

- marginata

Hydnochaete

- olivacea

Hydnum

- repandum
- umbilicatum

Hygrocybe

- conica var. conica
- cuspidata
- laeta
- pratensis
- virginea

Hygrophoropsis

- aurantiaca

Hygrophorus

- sordidus

Hymenochaete

- rubiginosa
- tabacina

Hymenoscyphus

- epiphyllus

Hypholoma

- dispersum
- sublateritium

Hypocrea

- chromosperma

Hypomyces

- chrysospermus
- completus
- hyalinus
- lactifluorum
- luteovirens

Hypoxyton

- fragiforme

Hypsizygus

- tessulatus

Inocybe

- calamistrata

Inonotus

- cuticularis
- glomeratus
- obliquus
- tomentosus

Irpex

- lacteus

Ischnoderma

- resinosum

Laccaria

- amethystea
- bicolor
- ochropurpurea

Lactarius

- aquifluus
- camphoratus
- cinereus
- colorascens
- deceptivus
- deterrimus
- griseus
- hibbardae
- hygrophoroides
- lignyotellus
- oculatus
- quietus var. incanus
- torminosus
- vinaceorufescens

Laetiporus

- sulphureus

Lasallia

- papulosa
- pennsylvanica

Laxitextum

- roseocarneum

Leccinum

- eximium
- snellii

Lentinellus

- ursinus

Lentinus

- strigosus

Lenzites

- betulina

Leotia

- lubrica

Leratiomyces

- squamosus var. thrausta

Leucopholiota

- decorosa

Lycogala

- epidendrum
- flavofuscum

Lycoperdon

- perlatum
- pyriforme

Lyophyllum

- connatum

Marasmiellus

- opacus

Marasmius

- capillaris

Megacollybia

- platyphylla

Melanoleuca

- alboflavida

Mycena

- inclinata
- leaiana

Oligoporus

- caesius
- tephroleucus

Omphalotus

- illudens

Oxyporus

- populinus

Pachyella

- clypeata

Panellus

- serotinus
- stipticus

Parmelia

- sulcata

Paxillus

- involutus

Peltigera

- canina

Peziza

- badia
- repanda
- varia

Phaeocalicium

- polyporaenum

Phaeolus

- schweinitzii

Phaeophyscia

- rubropulchra

Phallus

- duplicatus
- ravenelii

Phanerochaete

- chrysorhizon

Phellinus

- ferruginosus
- gilvus
- hartigii
- laevigatus
- tremulae

Phlebia

- incarnata
- radiata
- tremellosa

Pholiota

- albocrenulata
- alnicola var. alnicola
- aurivella
- squarrosoides

Phylloporus

- rhodoxanthus

Phyllotopsis

- nidulans

Physcia

- millegrana

Piptoporus

- betulinus

Pleurotus

- ostreatus

Plicaturopsis

- crispa

Pluteus

- atromarginatus
- aurantiorugosus
- cervinus var. cervinus
- pellitus
- umbrosus

Polyporus

- alveolaris
- badius
- brumalis
- elegans
- squamosus

Porodisculus

- pendulus

Porpidia

- albocaerulescens

Postia

- fragilis
- stiptica

Pouzarella

- sp.

Psathyrella

- conissans
- piluliformis

Pseudohydnum

- gelatinosum

Punctelia

- rudecta

Pycnoporus

- cinnabarinus

Rhodocollybia

- maculata

Russula

- brevipes
- compacta
- crustosa
- nigricans
- peckii
- variata
- vinacea

Schizophyllum

- commune

Schizopora

- paradoxa

Scleroderma

- cepa
- citrinum

Scutellinia

- scutellata
- setosa

Simocybe

- centuncula

Steccherinum

- ochraceum

Stemonitis

- axifera

Stereum

- complicatum
- ostrea
- striatum

Stropharia

- hardii
- johnsoniana

Suillus

- americanus
- granulatus
- pictus
- placidus
- salmonicolor

Syzygites

- megalocarpus

Tapinella

- atrotomentosa

Tectella

- patellaris

Thelephora

- palmata

Trametes

- elegans
- hirsuta
- pubescens
- suaveolens
- versicolor

Trichaptum

- abietinum
- biforme

Trichia

- varia

Trichoderma

- sp.

Tricholoma

- aestuans
- caligatum
- sejunctum
- subresplendens

Tricholomopsis

- decora

Tubifera

- ferruginosa

Tylopilus

- felleus
- rubrobrunneus

Tyromyces

- chioneus

Umbilicaria

- mammulata

Xanthoconium

- affine var. affine

Xerocomus

- chrysenteron
- subtomentosus

Xeromphalina

- campanella

Xerula

- furfuracea
- megalospora
- rubrobrunnescens

Xylaria

- longipes

Xylobolus

- frustulatus
